## 4. Booth Design

As a design fair, it is expected that attention be given to the booth design and presentation of product. Items to consider (but not limited to) are: overall design aesthetic, merchandising, wall treatment, flooring and lighting. Priority and preference will be given to exhibitors who design new booth spaces and who use professional interior designers/architects for the design of their exhibit space. The name of the firm should be included with the proposed design.

Overhead Signage and Lighting & Sound:

Please be advised that you must provide lighting for your booth display. It is mandatory that each booth is properly lit. Each exhibitor must order power directly from the facility. (Order form will be included in the Exhibitor Kit). The overhead lighting at the Vancouver Convention Centre West will not be sufficient.

- No overhead trade banners are permitted.
- No clip on lights are permitted.
- No pop up displays or roll up banners are permitted. Suspended installations and lighting are welcome, please send to management for approval.
- Compromising the sound in neighboring booths will not be permitted.

Your booth design must be submitted before your space can be confirmed.
