Wireless Internet

- Speeds of up to 15Mbps
- Fee includes first user, additional users can be added below
- Service starts for the time of activation by entering code into portal and runs consecutively
- Private wireless networks for higher bandwidth application may ordered via calling the exhibit services department
- The Vancouver Convention Centre Wi-Fi standards support 802.11 g/a/n on the 5 Ghz band. Ensure your device is compatible

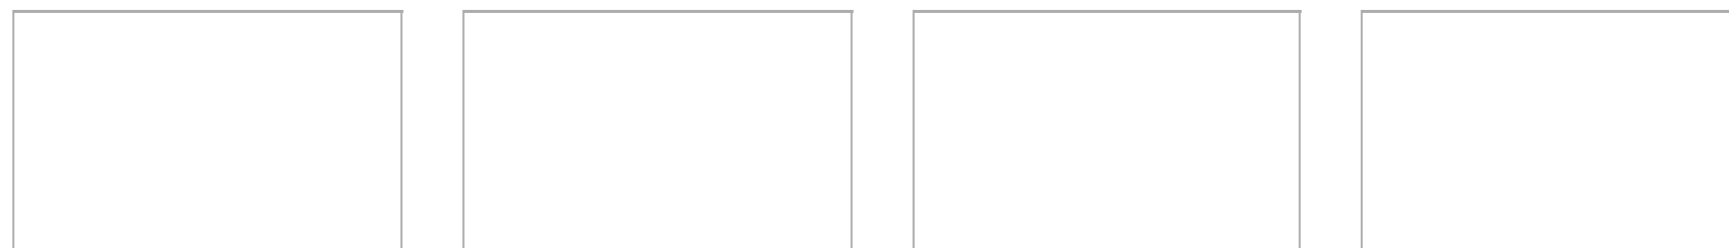

Point Of Sale Terminals – what you need to know

If you are using Wi-Fi to connect a POS system contact your provider to ensure your device can connect to Wi-Fi via a portal. PCI (Payment Card Industry) Security Compliance standards are updated frequently, it is up to you to ensure the service you are ordering complies with the standards. To mitigate connectivity issues, please enter your MAC* address here so we can register it on our system

*A MAC Address, the physical address known as Media Access Control (MAC), is a hardware identifier that uniquely identifies each device on a network. This information is usually on a sticker on the bottom of the POS device and is in the format of A1:A1:A1:A1:A1:A1. MAC address does not refer to the make/brand such as a Macintosh/Apple computer.

Please enter your MAC Address here if you are using a POS Device
